### ***Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-9, 12-19, 22-23 and 33-34 are drawn to nucleic acids and host cells.

Group II, claim(s) 10-11, 20 and 22 are drawn to polypeptides.

Group III, claim(s) claims 24-28 are drawn to a method of identifying compounds and a compound produced by such method.

Group IV, claim(s) 29-31 are drawn to a method of identifying DNA sequences.

Group V, claim(s) 32 is drawn to an antibody.

2. The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The special technical feature linking group I-V appears to be a nucleic acid molecule comprising the genomic DNA of *Candida albicans*. However, genes of *Candida albicans* have been isolated and known in the art. (see abstract in Gene, vol. 187, No. 2, pp. 151-158, 1997)

Therefore, the technical feature linking the inventions of groups I- V does not constitute a special technical feature as defined by the PCT Rule 13.2, as it does not define a contribution over the prior art. As set forth above, each of group I-V has a special technical feature that is

Art Unit: 1645

not required for the other groups.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

***Election***

4. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

a- If applicants elect group I, then there are additional election of species.

Please choose one of the nucleic acid sequences from SEQ ID 1-9.

Please choose one of the nucleic acid species from claims 4, 5, 6, 33 or 34.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

The species are shown to be distinct because they are drawn to a plurality of disclosed patentably distinct sequences which are structurally and functionally distinct molecules.

Art Unit: 1645

5. Applicants are required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
